PHANTOM PEAK: HALLOWED PEAK (2025)

12 trail recaps · Based on season notes supplied to the Explorers Club

1 · Dude Where’s My Mummy

Main character: Halloway | Themes: Mummies, Mystery, Games

Halloway recruits graveyard guards to find King Temu, a mummy loose during the Lunar Festival. A tablet, a paracryptic clue and a Videomatic vlog reveal that the fugitive is not the feared warlord King Temu V but his teenage nephew, King Temu IV. Murdered before he could enjoy childhood, the younger king wants to party and get a Game Station Mini. Pius has his fake ID, while Sparks has won the last console from Mr Feast. You trade the ID for the console and take it to Halloway, who can lure Temu back to his resting place.

2 · A Murder Most Fowl

Main character: Sherlock Bones | Themes: Murder mystery, Writing, Reality

Sherlock Bones is accused of murder, but Lovehart believes Meowiarty framed them. The investigation leads through Meowiarty’s hideout, Hogwood’s improv class and a strange fan-fiction contest whose story seems to predict your actions. Stickler supplies the banned Quill of Truth, a JONACO prototype that makes written events real. Its user is Edgar Allan Crow, the unseen narrator whose prose has killed Dogtor Watson and drawn Meowiarty into another murder. You confront Crow at the Undertakers and persuade him to surrender the Quill, allowing Sherlock Bones to write a happier ending.

3 · The Great Blimp Robbery

Main character: Copper | Themes: Heist, Disguises, Romance

JONACO is hunting the blimp thieves Blimpy and McScrimbles. Copper admits they are Blimpy and recruits you to steal the Jonas family jewels. You secure Sky Flex Supreme blueprints from Perigate, but McScrimbles is caught with the jewel and taken to a containment cell. The supposed bandit turns out to be Terrence. Following the prison plumbing leads you to Pius, who has recovered the jewel. Terrence asks you to use it as a ring and propose to Copper on their behalf. Copper says yes.

4 · Call of the Deep

Main character: Spectre | Themes: Black goo, Portals, Rescue

Spectre asks you to investigate black goo and find Vox, who vanished after sending a painting and a sample from Sir Franklin Figment’s collection. Clues in the Hall of Art and Diamines lead to Vox’s video message: a liquid Figment has trapped her and others inside JONACO’s hidden Hall of Fun. Mr Feast’s ride video points you toward the entrance. After submitting a ride idea to Pocket, you gain access through KLACKY and use a Jonabot at the Gamehouse to open a portal. Spectre then pulls the cube back through the painting to stop the Hall of Fun invading town.

5 · Domestic Sin

Main character: Stickler | Themes: Raccoons, Virus, Antidote

Stickler's Cool Squad has lost a package, so you infiltrate Raccoon City and join a special mission with Walter the Raccoon. Sparks sends you after a strike force trapped in a frightening house. The missing parcel contains a specimen of the P Virus, and Littlefield is also in danger. You rescue them, take the virus symptoms to RoboDoc, and follow the doctor's advice to make a remedy at the Art and Forgery Centre. Delivering the antidote to Stickler protects the rest of Phantom Peak.

6 · Ghouls Night Out

Main character: Perigate | Themes: Monsters, Stag night, Karaoke

Perigate wants to get ready for a blind date, but vandalised coffins and a dead Saloon worker demand attention. Copper recalls rowdy patrons who won a caravan, and the trail reveals a group of classic monsters celebrating Frankenstein's stag night. A secret karaoke bar, KLACKY footage and a Jonagraph call help you trace the missing groom to prison. Frankie asks you to contact his bride so she can bail him out. You return to Perigate with the information needed to close the complaint, although they decide against their date with the Fishman.

7 · A Knight's Honour

Main character: Platman | Themes: Knights, Oaths, Cryptocurrency

Sir Merrylegs keeps threatening Platman, so you infiltrate his circle by completing three tasks for Sparks. Merrylegs sends you to investigate Pius, giving you time to find a weakness: his troubled marriage and another cryptocurrency investment. You move his cash into crypto and discover he stole Killjoy the Songblade. His interrogation reveals the oath of XI, and a paracryptic clue establishes that he cannot attack another knight. You obtain the Knights' Oath and persuade Rexford to have Platman swear it, keeping him safe from Merrylegs for now.

8 · The Axiomatic Zone

Main character: Hogwood | Themes: Television, Missing actors, Portals

Hogwood's partner Beardy Hamm misses their anniversary date, and an old television theme leads you to The Axiomatic Zone. Producer Alex Zane reveals that several actors have vanished into the show. At the Gamehouse you discover that human lives are trapped inside it, and the programme's host is now coming for Hogwood. KLACKY cannot close the Axiomatic door because you are caught in a cycle. Dr Winter explains the project's origin and the protection needed to cross safely: a paper bag Hamm gave Hogwood. You pass on the clue and help close the door.

9 · A Fault in Our Star

Main character: Dr Winter | Themes: Artificial intelligence, Romance, Orbital laser

Dr Winter wants Marketing Bot destroyed for being too affectionate. You qualify as an orbital-strike engineer through Gifford and fire at the Summerhouse, but the laser itself has fallen for Winter. It arranges a fantasy date on Mount Absmore. KLACKY suggests overloading its love circuits by making Marketing Bot jealous. Rexford supplies the hottest technology in town, a toaster, and you persuade Winter to whisper sweet nothings to it. The laser's circuits overload and the town is saved.

10 · Ghost with the Most

Main character: Pocket | Themes: Ghosts, Video games, Exorcism

Pocket's celebration is interrupted when RoboDJ develops a tune that never drops the bass. A ghostly exorcist seems necessary to remove Mayor Nazabod from the machine, but investigating Beetlemilk releases the spirit into town. Beetlemilk gave Littlefield a worm, stole a film and trapped a tourist inside a Gamehouse game. RoboDJ and Nazabod save you from the ghost. With Spectre's help, you learn that Pocket can delete Beetlemilk from RoboDJ, ending the emergency and protecting the mayorship.

11 · Flight of the Furbish

Main character: Furbish | Themes: Escape, Blimps, Space

The JIA sends you to find Furbish, while Gifford asks you to erase a compromising tape of their father. You delete the digital recording through KLACKY, but Pius still has a physical copy. The JIA already knows Furbish is a puppet and back in town, so you must get them away. A blimp ticket is refused and a submarine proves no better. Mr Feast's space dating show offers the safest route: a rocket to the moon. You bring its application to Gifford so Furbish can escape.

12 · The Coin Lands Sideways · Secret trail

Main character: Littlefield | Themes: Memory, Multiple dimensions, The Great Undoing

Littlefield is worried about missing correspondence concerning a coin that lands sideways. Perigate removed the posters, but a fragment of a Church of the Cosmic Platypus video survives. Pius explains the Cosmic Flip, leading you to a historian and then to Furbish, who has been stealing Jonapost mail. Furbish remembers the boat ride and believes the town's changing memories reflect several dimensions at once. Someone is choosing which version the townsfolk remember, while tourists remain unaffected. Furbish suspects Jonas benefits from the changes.
